Welcome to Coding!!!

In this class, you will learn about basic computer science concepts through plugged and unplugged activities. We will use SpheroEdu and Scratch platforms.

On both platforms, you will use block-based programming. Then you will be introduced to JavaScript and preview this programming language.

When using the Sphero robots, students will be working in small groups. Students will systematically test and refine programs using a range of test cases.

As a reminder, the district recommends wearing a face mask.

Grades will be based on total points. Students will have projects, assignments, and reflections to complete throughout the semester. A rubric will be provided for each project.
